Conditionals

Conditionals

```
if ( test ) statement
```

The full if-statement is:

```
if ( something ) then
  do something
else
  do otherwise
end if
```

The 'else' part is optional; you can nest conditionals.

Case statement

```
integer i
select case (i)
case (:-1)
  print *,"Negative"
case (0)
  print *,"Zero"
case (1:)
  print *,"Positive"
end select
```
